Education

A.K.T Memorial College Of Engineering And Technology , **Sep. 2023 – Apr. 2027**
Bachelor of Technology in Information Technology —CGPA: ***7.90*** *Kallakurichi ,Tamil Nadu*

Government Boys Higher Secondary School Boys **2022 – 2023**
HSC *(Class* ***XII****) — Percentage:* ***72.33*** *Kallakurichi ,Tamil Nadu*

Government Higher School **2020 – 2021**
SSLC *(Class* ***X****)* *Kallakurichi ,Tamil Nadu*

Technical Skills

Programming Languages: Java, Python, SQL
Developer Tools: VS Code, Git, GitHub
Concepts: OOP, Data Structures, DBMS

Internship

Hanon System Pvt. Ltd., Chennai **July 2025**
INTERN TRAINEE *Chennai, Tamil Nadu*

- Gained hands-on experience in automotive manufacturing and industrial operations.
- Learned production processes, quality standards, and workplace safety practices.
- Developed an understanding of target pressure management, process monitoring, and operational efficiency.
- Strengthened problem-solving, teamwork, and communication skills in a professional work environment.

Projects

DeepShield: AI-Based Fake Voice Detection System Using Deep Learning

(Final Year Project - Ongoing)

- Developed a deep learning-based system to detect AI-generated and fake voice recordings.
- Implemented audio preprocessing and feature extraction techniques for voice analysis.
- Trained a deep learning model to classify voice samples as real or fake.

Designed a real-time detection system to improve protection against voice-based fraud and impersonation.

Technologies: Python, TensorFlow, Librosa, NumPy, Scikit-learn, Deep Learning.

RL-Based Zero-Day Attack Mitigation Framework

- Developed an AI-driven framework to detect and mitigate zero-day cyberattacks.
- Implemented Reinforcement Learning for autonomous threat detection and real-time response.
- Analyzed live network traffic using Scapy to identify malicious activities.
- Optimized the solution for resource-constrained academic network with adaptive threat mitigation.

Technologies: Python, TensorFlow, Scapy, Reinforcement Learning.

Publications

Reinforcement Learning-Driven Autonomous Zero-Day Attack Mitigation Framework for Resource-Constrained Academic Networks

- Published in the **4th International Conference**, Surya Group of Institutions (2026).
- Presented a Python-Based AI cybersecurity solution focused on autonomous zero-day attack detection and mitigation using Reinforcement Learning.

Certifications

Programming in Java
- *NPTEL*

TCS iON NQT - Cognitive
- *TCS iON (59.91%)*

Technical Activities

∗ **Project Expo Participant**: Presented the RL-Based Zero-Day Attack Mitigation Framework at the Project Expo hosted by St. Anne's College of Engineering and Technology, showcasing an AI-driven cybersecurity solution.

∗ **Workshop Participant**: Participated in a One-Day Workshop on "Explainable AI (XAI): Methods, Metrics and Model Transparency" conducted by the Department of Computer Science and Engineering, Idhaya Engineering College for Women.

Declaration: I hereby declare that the information provided in this resume is true, complete, and accurate to the best of my knowledge and belief. I take full responsibility for the correctness of the information mentioned above.
